DESIGN AND FABRICATION OF
DROP TOOL MECHANISM

A Dissertation Submitted in Partial
Fulfilment of the Requirements of
the Post Graduate Diploma
(Production and Industrial Engineering).

at the

INDIAN INSTITUTE OF TECHNOLOGY, DELHI.

by

AVINASH CHANDRA AGRAWAL
Indian Institute of Technology, Delhi.

I hereby forward the thesis entitled "Design and Fabrication of Drop Tool Mechanism" prepared under my guidance in partial fulfilment of the requirement for the Post Graduate Diploma in Production and Industrial Engineering of Indian Institute of Technology, Delhi.

(N.K. Tewari)

Department of Mechanical Engineering.

Dated: 13.8.69.

Delhi.
ACKNOWLEDGEMENT

The author expresses his gratitude, and offers his sincere thanks to Professor N.K. Tewari, under whose guidance the project work has been carried out. He is also thankful to Dr. B.L. Juneja for his help given so willingly.
# CONTENTS

## Chapter-1

1. History and Review of Past Work ........................................... 1 - 3
2. Design of the Drop Tool Mechanism ..................................... 4 - 9
3. Process of Metal Cutting and Shear Zone .......................... 10 - 11

## Chapter-2

1. Kinematic Analysis of Drop Tool Mechanism .................. 12 - 14
2. Abuladze's Analysis for Plastic Contact Zone ................ 15 - 17
3. True Mean Shear Rate in Chip Formation ....................... 18 - 19

## Chapter-3

1. Calculation of Time taken and Velocity of Dropping .......... 20 - 21
2. Study of Chip Curl, Built up Edge Formation, etc. .......... 22 - 27
3. Technique of Mounting Specimen ....................................... 28 - 30
